Enthalpy, Moisture and Ventilation Issues in Buildings

The CIB Encouraged International Journal of Building Pathology and Adaptation has just published a special issue on Enthalpy, Moisture and Ventilation Issues in Buildings.

Table of Contents

- Characterisation of air permeability of common ceiling linings and penetrations
By: Stephan Harald Rupp, Manfred Plagmann
- Hygrothermal simulation of cathedral ceiling roofs with ventilated roofing tiles
By: Philipp Kölsch
- Void conditions and potential for mould growth in insulated and uninsulated suspended timber ground floors
By: Sofie Pelsmakers, Evy Vereecken, Miimu Airaksinen, Cliff C.A. Elwell
- Must attic ventilation be preserved in energy retrofits?
By: William Rose
- Evolution of sub-floor moisture management requirements in UK, USA and New Zealand 1600s to 1969
By: Nigel Isaacs

- Design limits for framed wall assemblies dependent on material choices for sheathing membranes and exterior insulation
By: Ivan Lee, Patrick Roppel, Mark Lawton, Prudence Ferreira
- Special issue on enthalpy, moisture and ventilation issues in buildings
By: Nigel Isaacs, Steve McNeil, William Rose

Guest Editors

Nigel Isaacs, Steve McNeil and William Rose.
